We will not produce 72 cell panels anymore.

It is possible to use SoliTek Clamps with BayWa C-47 or C-24 rails, but assemble of the system is a bit complex from supply side.

In order to use 150 mm SoliTek clamps you need to combine **BayWa M8** nuts with **BOLT WITH HEXAGON SOCKET HEAD M8 X 40**

BayWa M8 nuts have to be ordered on request from BayWa, because usually those nuts are combined in set with framed clamps. Order code for this component is 03-000230.

For bolt - it is DIN912 STST A2 bolt (<https://www.solelgrossisten.se/product/solitek-infastningsskruv-din-912>)

Subject: Sv: Frameless module - Innoventum - SoliTek SolidPro 380W

Thanks for your answer Andrejs,

1.

Will you produce Frameless GlasGlas 72/144-cell modules in the future?

If so – when will they be available?

What will the watt class be?

The project by Innoventum is planned with the 72-cell size.

2.

<https://www.solelgrossisten.se/product/solitek-infastningsplatta-28x15-mm-gangad-m8>

see above link

This plate is fastened to the clamp with

<https://www.solelgrossisten.se/product/solitek-infastningsskruv-din-912>

In my understanding, this screw and bolt has nothing to do with the type of rail.

But the plate(that is attached to the clamp with the screw and bolt) is the one piece that will have to fit and lock in the Novotegra C-rail.

Can you confirm that the plate fits and lock with

Novotegra C-rail <https://www.solelgrossisten.se/product/novotegra-c-skena-c47-540-m-x-47-mm-svart>

Weland Stal C-rail <https://www.solelgrossisten.se/product/weland-infastningsskena-l-226-m-vfz>

Thanks

Mikael

Subject: VB: Frameless module - Innoventum - SoliTek SolidPro 380W

Hi Andrejs,

Kindly see below.

1

What is the delivery time for SOLIDPro 380W?

2.

Do we have to order full pallets?

Or are we able to order exactly 87 modules?

3.

The clip (infästningsplatta) for the clamp (for frameless module) fits well with Novotegra C-rail, correct?

See below

Thanks

Mikael

Hello Mikael,

Herewith the BOM that we are looking into.

I believe the module would be the bottle neck in term of delivery?

Please check with Solitek for delivery time for this order.

Thank you

Julien

Hello Mikeal,

Quick question

The clamp will be rubber + alu ? Not only rubber as the photo on the website

SoliTek - Infästningsplatta 28x15 mm gängad M8 will slide in the rail, but which rail is compatible? Schletter, K2, ESDEC?

Thank you

Julien

Hi Julian,

This clamp is in our web store!

[https://www.solelgrossisten.se/category/solceller-glasglas?
tg%5Boption%5D%5B5%5D%5B0%5D=SoliTek](https://www.solelgrossisten.se/category/solceller-glasglas?tg%5Boption%5D%5B5%5D%5B0%5D=SoliTek)

Have a look at this page for all the GlassGlass panels (both framed and unframed) and clamps available for frameless modules.

This clamp works well with both Weland C-rail and Novotegra C-rail.

Hello Mikael,,

It would be 74 modules (+ few extra)

To be sure about the fitting I would like to get info about the clamp.
What is the clamp recommended for this modules? Do you have the link to your page?

Thank you

Hi Julian,

The frameless modules are not a stock item.
Sales volume of these models are smaller.

Hence, after your order of them, we will get them with our
next shipment from the SoliTek factory in Lithuania.
You should have them within 3-5 weeks.

How many do you want?
If it is more than one pallet – no problems!
Fewer than 1 pallet. There might be longer shipment time.

Thanks

Mikael

<mikael.johansson@solelgrossisten.se> wrote:

Hi Julien,

Answers in Green below

1.

- Do I need the coupling box if I use SSO?"

You do not need the ZJ Beny Kopplingsbox.

But you need the FerroAmp Power Distribution – 5SSO – IP65 (art.nr. PS00778) -<https://www.solelgrossisten.se/product/ferroamp-dc-fordelningscentral-4-anlutningar>

2.

- The client want it all black. Will

be the rail visible ? Is there black clamp?

Black Clamp –

CF100-8020-

B : <https://www.solelgrossisten.se/product/esdec-clickfit-evo-universal-panelklamma-svart>

Make sure to choose **Black option** when you are in the ESDEC Calculator
- <https://eu.esdec.com/sv/kalkylator/>

Then you will get all details in black. Including the end cap. Then the rail end will appear black:

Art.nr: CF100-8060-B
<https://www.solelgrossisten.se/product/esdec-clickfit-evo-andkapa-svart>

Rails does not come in black. But rails will be covered by panels and end cap.

3.

- Any Rabatt code to share :-)

Sorry, no discount code to share.

But if you log out and log in again, your prices should correct to the new price list that I just put you in.

You might have to repopulate the Kundvagn again with the same articles. But hopefully not.

4.

- Do I miss anything on the list? (I have a lot of MC4 and cable on stock)

I presume that you have done the full calculation in ESDEC's calculator.

If you have and
you copy that materialist – you
are good.

Think about that
you can make a CSV file in the
ESDEC calculator. And then
import that CSV file directly
Into the
Kundvagn.

All the Best

Mikael
