

## Seamed metal roof | insertion system top-fix

Single-rail insertion system with modules installed in landscape

### Perfect aesthetic and high efficiency

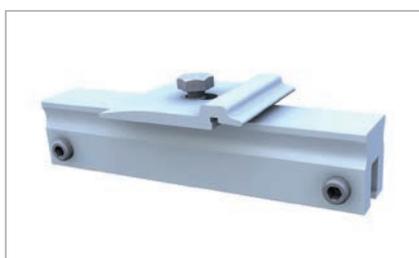

- clamping technology with clamping points on the seam flanging
- mounting modules in portrait or in landscape
- quick and efficient mounting from above
- Clamp for insertion system on standing seam roof completely pre-assembled with cross rail connector

### product variants

- also suitable for standing seam roofs made of copper
- insertion rail in blank and black anodized – color matching the module

## Your benefits

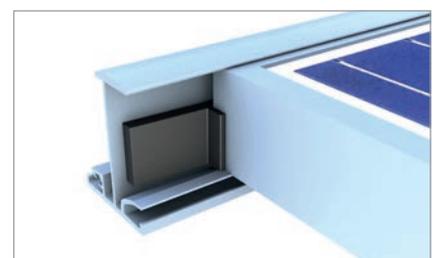

- high-end installation aesthetics and time-efficient mounting thanks to insertion technology
- only a handful of components – quick assembly
- cost-optimised single-rail system
- tension-free and floating module mounting

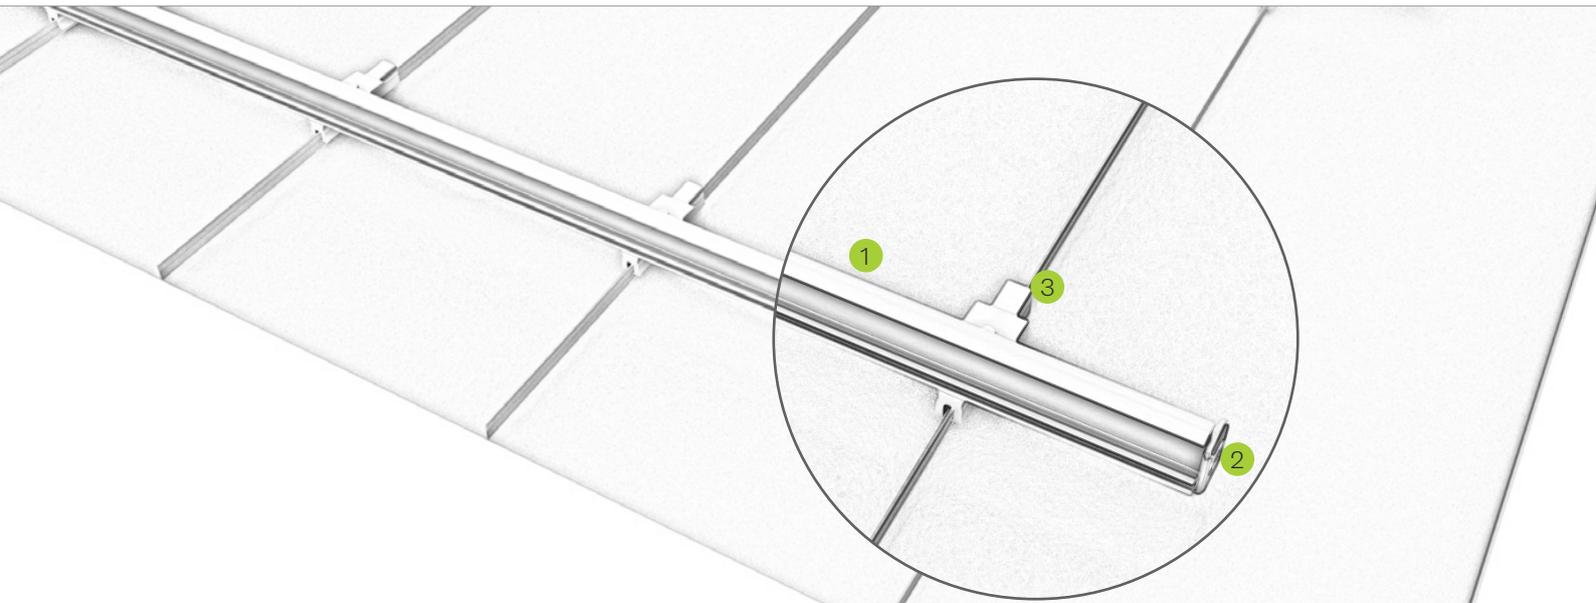

Clamp for insertion system on standing seam

Rail connector insertion rail

Module security at low roof inclination

## Pic Designation

- 1** Insertion rail
  - insertion rails in blank/black anodized for frame heights
  - tension-free and floating module mounting
- 2** Edge stop
  - color-coordinated with the insertion rail
  - prevents modules from slipping out
- 3** Seam clamp
  - completely pre-assembled with cross rail connector
  - easy connection to the insertion rail
- 4** VA saddle
  - for copper roofs
  - prevents oxidation of the component
